

Hygiene concept of Messe Stuttgart

Trade fairs and exhibitions in Stuttgart can be staged safely. Messe Stuttgart has developed a concept to protect the health of its exhibitors, visitors and employees.

Messe Stuttgart is monitoring the current situation relating to Covid-19 (Corona virus SARS-CoV-2) very closely. To this end, we are in close contact with the responsible authorities in the federal state of Baden-Württemberg and are taking account of the requirements and recommendations regarding the staging of events. The safety, health and well-being of all people who come to us is our main concern and has the highest priority.

In order to enable the safe conducting of events, we have developed a concept that combines hygienic, medical and organisational considerations. The measures are combined under the heading "Safe for people. Good for the economy".

The hygiene concept is based on the applicable requirements „Measures against the spread of the Corona virus of the State of Baden-Württemberg“ valid as of 01 July 2020, as well as the Ordinance of the Ministry of Economics and the Ministry of Social Affairs on the containment of transmission of the Corona virus (SARS-CoV-2) at trade fairs, exhibitions and congresses (Corona Ordinance Messen - CoronaVO Messen of 14 July 2020).

From 1 September 2020, the special requirements and the hygiene requirements in particular of the applicable issue of the Corona Ordinance and the Ordinance of the Ministry of Economics and the Ministry of Social Affairs on the containment of transmission of the Corona virus (SARS-CoV-2) at trade fairs, exhibitions and congresses (Corona Ordinance Messen - CoronaVO Messen of 14 July 2020) have to be observed at all events according to § 1 section 1, unless otherwise provided for in this Regulation.

The implementation of and conscientious compliance with the protection and hygiene regulations applicable on the exhibition grounds at the time of the event is the responsibility of Landesmesse Stuttgart GmbH for its own events and the responsibility of the guest event organiser for guest events. These requirements apply in addition to our "Technical Guidelines".

In order to comply with the distance regulations of 1.5 m between persons, the number of persons present at the same time is determined for each trade fair, exhibition and in the exhibition area of a congress using the formula: Minimum area of seven square metres per visitor in relation to the exhibition area accessible to visitors. Separated unoccupied hall areas that are not freely accessible shall not be included in the calculation of the visitor numbers.

Operators, organisers, exhibitors and their employees and other persons involved will not be included in the calculation.

For congresses with exhibition areas, § 2 paragraph (3) of the Ordinance of the Ministry of Economic Affairs and the Ministry of Social Affairs on the Containment of Transmissions of the Corona virus (SARS-CoV-2) at Trade Fairs, Exhibitions and Congresses (Corona Ordinance Trade Fairs - CoronaVO Messen of 14 July 2020) shall apply.

Current information on the Corona virus and our hygiene and safety standards you can find on: www.messe-stuttgart.de/safe-expo.

All measures listed below are based on the current state of knowledge and the corresponding legal rules and regulations. They can be adjusted to future requirements at any time. Naturally, Messe Stuttgart will inform you about any changes as soon as possible.

To organisers and exhibitors, fact sheets comprising the relevant information for the conducting of trade fairs, exhibitions and congresses will be provided.

Following are the measures based on the Corona Ordinance.

A. General measures on the trade fair grounds

- The required number of disinfectant dispensers is available throughout the trade fair grounds of Messe Stuttgart. Only non-reusable towels (paper towels) are used in the sanitary areas.
- The cleaning frequency and disinfection of the sanitary areas and of highly frequented contact areas (such as banisters) throughout the trade fair grounds have been increased during event operations.
- The trade fair grounds of Messe Stuttgart have a building management system based on the highest technical standards. This enables intensive air exchange to take place in the exhibition halls.
- Transparent partitions made of glass and plastic are installed at every counter with contact between employees or service providers of Messe Stuttgart and attendants of events (e.g. at counters in the Press Centre, VIP Lounge, the trade fair shop, cloakrooms, service offices, information counters).

B. Conduct on the trade fair grounds

- **Distancing regulations**
During their stay on the venue, the minimum distance between persons must be 1.5 m according to the Corona Ordinance. Exceptions are made for:
 - o Families, life partners and persons belonging to the own household
 - o Groups of visitors (up to 5 persons) from one company who can prove that they travelled together and who can guarantee for traceability

Messe Stuttgart encourages compliance with the distancing rule by keeping a minimum distance of 1.5 m by floor markings in relevant places.

- **Obligation to wear masks**

During their stay on the fair grounds, persons from the age of six years must wear a non-medical mask or a comparable mouth-and-nose cover.

The obligation to wear a mouth-and-nose cover is suspended:

- o For persons for whom the wearing of a nose-and-mouth cover is not possible due to medical or other reasons, or not reasonable (please provide a medical certificate).
- o On exhibition stands at trade fairs, exhibitions and exhibition areas of congresses as long as the organiser or exhibitor ensures that the minimum distance of 1.5 m between persons can be observed.
- o While seated as long as the organiser or exhibitor ensures that the minimum distance of 1.5 m between persons can be observed. The nose-and-mouth cover must be worn until seated.
- o For employees who work in a place where visitors are not present.
- o When using gastronomic services
- o When a different protection of the same efficiency is in place to protect other people

Persons who do not comply with the rules to wear masks have to leave the premises.

C. Information and monitoring

- In the run-up to the event (e.g. during registration), all participants in an event (visitors, exhibitors, journalists, employees, service companies, etc.) will be informed about the hygiene and protection measures).
- Reference to the measures will also be made on the trade fair grounds in a suitable form and to an adequate extent (posters/notices, flyers, loudspeaker announcements, etc.).
- Protection and hygiene measures will be supplemented by specially trained personnel on the trade fair grounds. Messe Stuttgart employs specially trained personnel to ensure that the required distance rules are observed.
- Messe Stuttgart recommends that visitors use the Corona App of the German Federal Government.
- A ban on entering the premises or participating in events according to § 7 of the Corona Ordinance applies to persons
 - o who are or have been in contact with persons infected with the Corona virus if 14 days have not yet passed since the last contact.

- o who have typical symptoms of an infection with the Corona virus, particularly disturbances to the sense of smell and taste, fever, cough and sore throat.
- For information about trade fairs, safety and hygiene, please contact safeexpo@messe-stuttgart.de.

D. Restaurants / Catering

- For trade fair restaurants, bistros, catering and tastings on exhibition stands at Messe Stuttgart, the valid protection and hygiene regulations according to the applicable Corona Ordinance of Baden-Württemberg apply.
- Compliance with the applicable rules for gastronomy and catering is ensured by spacing gastronomic offers well apart, by using out-door areas (e.g. as Food Courts), by offering food to-go and by planning special areas for the consumption of food (seating tables).

E. In the halls

- Keeping the minimum distance of 1.5 m between participants is made possible by arranging the seating in conference rooms and other areas accordingly.
- Aisles between trade fair stands (≥ 3 m) are designed for the number of visitors expected at the same time. Floor markings help to follow the walking directions in the trade fair aisles.
- If necessary, (for example for sales activities into the aisles) the width of the aisles has to be adjusted in order to ensure that the protection and waiting zones along the stands are unaffected.
- The areas on the front sides of the halls remain free if necessary in order to provide sufficient space for sanitary facilities and bistros. To this end, the necessary waiting areas for sanitary and gastronomic facilities are planned carefully in advance on the basis of expected visitor numbers.

F. Registration, access and payments

- In the exhibitor and visitor communication, the applicable public regulations and notification channels on the venue are thoroughly explained.
- Entry codes which (specialist) visitors receive from media, exhibitors or the trade fair company in advance, can be redeemed online at the Messe Stuttgart ticket shop.
- Visitors receive their entry tickets exclusively online and in advance via the Messe Stuttgart ticket shop. Every ticket is valid for the specified exhibition day only. There are no multi-day tickets. It will be possible to visit the fair on more than one day, though. In this case visitors have to register for every day of their visit individually. This enables a tracing of all participants if necessary and prevents queues in front of the cashiers.

- Visitor tickets will be issued with a specified time of entry if necessary.
- All attendants of trade fairs are subject to a detailed registration with immediate effect. This means: All essential personal data have to be provided at the advance online registration. The maximum number of visitors on the venue is monitored. Messe Stuttgart ensures by targeted measures (e.g. blocking the turnstiles) that the maximum number of visitors is not exceeded. When the maximum number is reached, access to the venue is no longer possible.
- Queuing is limited and made safe by means of access control and distance markers on the floor. A controlled visitor guidance supports compliance with the distancing rules.
- Access and exit for exhibitors and visitors is only possible via a limited number of entrances and exits.
- Contact free payment is supported in many facilities of Messe Stuttgart. This applies to the trade fair restaurants and bistros. Messe Stuttgart follows the established solutions in the retail sector.

Safe for People.
Good for the Economy.
