

Information/Registration of multi-storey structures

Name of trade fair: _____ Person to contact: _____

Hall/Stand number: _____ Tel.: _____

Exhibitor/Stand builders: _____ E-mail: _____

For the approval of multi-storey structures the following documents must be submitted in German language to Messe Stuttgart at the latest 8 weeks before the start of stand set:

- a) Building specification
- b) Dimensioned stand construction drawings (ground plans, elevations, sectional views)
- c) On submission of a duly stamped official inspection logbook/type qualification, the above items a) and b) shall not be required.

For multi-storey structures, a proof of structural stability is required. In principle, the test static engineer commissioned to perform this work shall come from Baden-Württemberg. A test static engineer, who is commissioned to perform a static test, may also, by way of exception, come from a German federal state other than Baden-Württemberg.

The work shall then be accepted on-site by a test static engineer who is recognised in Baden-Württemberg and who shall provide an acceptance certificate. This certificate must be available at the stand for presentation. The test static engineer on-site must be authorised by the exhibitor / stand builders.

Please send your documents to Landesmesse Stuttgart GmbH and also to the authorised test static engineer:
technik@messe-stuttgart.de

Please tick as appropriate:

Test static engineer
