

The new marketplace for the development and procurement of precision parts on 9 and 10 June 2026, Messe Stuttgart

Become an exhibitor and meet your target group directly! Make use of the opportunity to demonstrate your production skills to qualified trade visitors. At our trade fair you will meet decision-makers, technicians and buyers from future-oriented industries such as mechanical engineering, automotive technology, defence, robotics and renewable energies – people who are looking for excellent precision parts and reliable production partners. Thanks to a clearly structured service directory containing information about application areas, production processes, materials, tolerances, certifications and batch sizes, potential customers can purposefully look for you before the trade fair starts. **Position your company where demand originates.**

1 Precision parts

2 Contract manufacturing

3 Machining

Precision counts.

Benefit as an exhibitor from these advantages:

- A first-rate two-day **B2B event** focusing on industrial dialogue and business initiation
- **Exhibition by leading suppliers** – with order-based precision production as the focal point
- Key processes: **turning, milling, grinding, sawing, eroding, hardening, honing, cold extrusion**
- Plus: **component assembly and additive manufacturing**
- **Technical forum** with practical impulses regarding market trends, technologies and applications
- **Separately bookable meeting rooms** – ideal for confidential project discussions
- **Networking area** with superb catering for relaxed business contacts
- **Exclusive networking evening** in selected rooms to intensify contacts in a special atmosphere
- Two other trade fairs will be held concurrently: **CastForge**, International Trade Fair for Castings and Forgings with Processing, and **The Battery Show Europe**
