EDITORIAL

Dear exhibitors,

Hello from NORTEC – or “Moin” as we say in Hamburg! For 2026, we have strongly freshened up the trade fair for manufacturers in the north. The teams of Messe Stuttgart and the German Machine Tool Builders’ Association (VDW) can count on their expertise, a good international network and the experience gained from numerous successful industrial exhibitions such as EMO, AMB, GrindingHub or Moulding Expo. Under the motto “Production. Innovation. Future” the concept of NORTEC 2026 is even

more focused on the needs of the exhibiting companies and the professional audience.

Behind the fresh image, you can expect a perfectly positioned platform for your offers: with a duration of three days, a new nomenclature as well as lead management and WLAN that are now included to improve your trade fair experience. We look forward to a future-oriented NORTEC – together with you!

OUR EXHIBITION AREAS

NORTEC is the Trade Fair for Manufacturers in northern Germany. Exhibiting here means to use a high-quality platform for sales and

networking. This is because the indispensable industry meeting point covers the entire value chain of metalworking.

- Machine tools and manufacturing systems
- Precision tools
- Measuring and testing technology
- Robotics and automation
- Software and IT solutions
- Components, assemblies, accessories
- Operating materials and consumables
- Logistics and operational equipment
- Services

OUR VISITOR INDUSTRIES

As an exhibitor at NORTEC, you will have the opportunity to present your products and solutions to a specialist audience from a wide range of industries. The trade fair attracts decision-makers from a variety of industries

so that you will meet an audience that is not only interested in innovative technologies, but also actively seeking partnerships and solutions to position their companies flexibly and competitively for the future.

- Mechanical and plant engineering
- Vehicle construction
- Medical technology
- Electrical/electronics industry
- Precision mechanics/optics
- Supplier industry
- Metalworking and processing industry
- Aerospace technology
- Tool and mould making
- Maritime technology/shipbuilding
- Contract manufacturing
- And many other industries

Heyde | ZAE Antriebssysteme | and many more

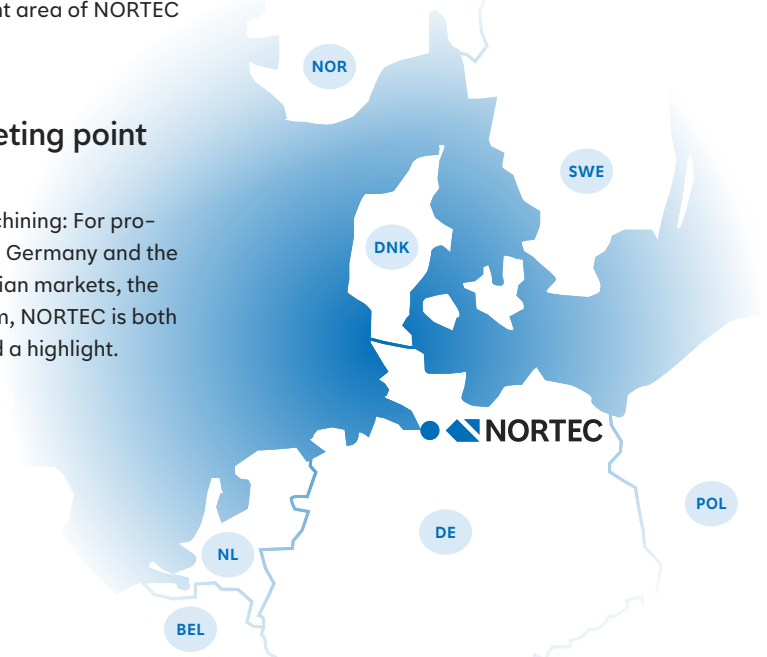

HAMBURG, THE REGION AND STRONG NEIGHBOURS

Hamburg, the gateway to the world, is not only a pulsating metropolis, but with its associated districts in Lower Saxony, Schleswig-Holstein and Mecklenburg-Western Pomerania, the largest economic area in Northern Europe. In the regional catchment area of NORTEC

alone, 34,000 employees work in mechanical engineering, complemented by a large number of contract manufacturers and suppliers. Other industries such as aerospace and ship-building are also represented.

The industry meeting point for the North

From automation to machining: For professionals from northern Germany and the neighbouring Scandinavian markets, the Netherlands and Belgium, NORTEC is both a must-attend event and a highlight.

OUR EXHIBITOR COMMENTS 2024

„There are more than 600 mechanical engineering companies in northern Germany alone. That is why the NORTEC trade fair is so important.“

Lars Reeder
Managing Director Hein & Oetting Feinwerktechnik GmbH

„The special thing about NORTEC is that we can go into real detail with our visitors.“

Christian Thiele
Head of Communication Hartmetall-Werkzeugfabrik Paul Horn GmbH

„Our brand image is very well received, the stand is excellently frequented and we had great feedback.“

Jens Martin
Technical consultant Spanntechnik SCHUNK SE & Co. KG

„After a long break, we have again shown the flag at NORTEC. We have had very good conversations, also with new customers.“

Oliver Loth
Sales Manager Citizen Europe GmbH

„NORTEC offers us a very good platform to serve the northern German region, so we use the opportunity to be present locally.“

Dr.-Ing. Alexander Knitsch
Sales Manager Laser Division Germany TRUMPF SE + Co. KG
